Granulation sizes

granulation	use
07	Extra coarse. Used for large and solid image areas.
09	Coarse. Generally used for large image areas and types between 36 and 72 points.
11	Medium-coarse. Generally used for large/medium image areas and types between 27 and 42 points.
14	Medium-fine. It is the most used granulation for its excellent versatility. Suitable for types between 11 and 30 points.
18	Extra fine. It is the classic granulation for fine and italic types between 6 and 14 points.
